

# Male Breast Cancer Global Alliance

---

**Thank you for agreeing to share your story with us!**

We invite you to share your male breast cancer story with us at the Male Breast Cancer Global Alliance. With your help, we will continue to bring everyone together and educate the world about male breast cancer.

Breast cancer does not discriminate. The faces of male breast cancer include retired NFL players, former military men and many other men with breast cancer simply wanting to raise awareness. We aim to be a resource for people facing the rare diagnosis of male breast cancer. Each man's journey is important and vital to understanding this disease. Your association with us will give other men the opportunity to see how peers have faced the rare diagnosis of breast cancer.

We are on a mission to build awareness through the wisdom and experiences of survivors. We attend conferences, so we can become more knowledgeable and advocate on behalf of the men. Until we educate everyone, including the medical community concerning the need for more testing and clinical trials focusing on men with breast cancer, our mission continues to be an uphill battle.
